

1

Release the two Tekna® lock screws with the allen key provided.

2

Remove the panels from the points of the tree on both sides.

3

Release the two Tekna® lock screws on the gullet plate with the allen key provided.

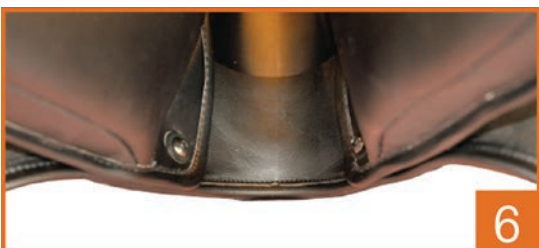

4

Attach the new size gullet plate into the same position and re-insert the two Tekna® lock screws. Tighten with the allen key provided.

5

Re-insert the tree points into the panel pockets and re-insert the two Tekna® lock screws with the allen key provided.

6

Congratulations.

You have now finished changing the gullet plate on your Tekna® saddle.

In just six easy steps you can choose gullet plates in a range of gullet widths.

### Tekna® Plate Fitting Gauge

A quick way to choose a correctly fitting gullet plate for your horse.
