

## Tekna<sup>®</sup> is an evolution in saddlery

Taking the standard and raising the bar.

While giving a respectful nod to centuries of tradition, the Tekna<sup>®</sup> range of synthetic saddlery challenges conventions and takes saddlery forward, combining craftsmanship with the advancements of modern technology that go beyond skin deep.

The light-weight synthetic tree at the core of a Tekna<sup>®</sup> saddle has always been adjustable to provide an individual custom fit. Now Tekna<sup>®</sup> exceeds expectations and gives the option to change the gullet and fit of your saddle yourself with many different gullet plates available for each style of saddle. The Quik-Change<sup>®</sup> gullet system features in all new S Series Tekna<sup>®</sup> saddles, making the change of a gullet plate simple.

The concept isn't new but the execution is. It's Tekna logical.

## Unique Tekna<sup>®</sup> features

**Quik-Clean<sup>®</sup> Materials:** with the convenience of wipe-clean maintenance while allowing durability and air-flow, these water resistant materials make Tekna<sup>®</sup> saddles ideal for training and competition in all conditions.

**Quik-Change<sup>®</sup> Gullet Plate System:** Tekna<sup>®</sup> S4, S6, S8, Club and NOW LeTek saddles are each equipped with the Quik-Change gullet plate system. In just moments you can change the gullet width by interchanging any of up to six available gullet plates.

**Quik-Form<sup>®</sup> Gullet System:** Tekna<sup>®</sup> A4, A6, A8 and Pony saddles are built on Quik-Form<sup>®</sup> saddle trees, allowing the saddle width to be individually tailored. With the Tekna<sup>®</sup> gullet adjuster, saddles can be widened or narrowed. It is as easy as taking the saddle to an authorised Tekna<sup>®</sup> dealer for adjustment.

## Tekna<sup>®</sup> Saddles

The exclusively designed Panel System is a pocket composed of a layer of latex, felt and wool flock. This allows a comfortable and even contact with the horse's back. This also allows for the panels to be repacked and individually shaped.

There is a Tekna<sup>®</sup> saddle for every style of rider, from jumping to dressage, from pupil to professional. Tekna<sup>®</sup> saddles are the ultimate hybrid of style, value and performance and are supported by a five year tree warranty.

The Tekna<sup>®</sup> range is complemented by an extensive catalogue of bridles, reins, girths, stirrup straps, horse boots and accessories, all manufactured to the same exacting Tekna<sup>®</sup> standard.

So, if you're in the market for quality synthetic saddlery, choose Tekna<sup>®</sup>... It's Tekna<sup>®</sup> logical!
